

THE BENDELTA COMPETENCY LIBRARY - Best Practice Intellectual Library

One example of Bendelta's world-class frameworks is the Bendelta Library. Utilising completely new methodologies to create a forward-looking and future proof Competency & KPI Library, we leveraged the power of new technologies to create a system that automatically updates itself and ensures ever-better validity. The Bendelta Library - with its revolutionary Voices Choices that enables organisations to tailor the style of language to their preference - is now the engine used by award-winning performance management software provider Sonar6.
