

# BENDELTA LEADERSHIP LUNCH

## THE DAWN OF A NEW SCIENCE

### How to build the most critical leadership capabilities for 2020

Attend this event with our inspiring panel to learn what defines world class leadership performance.

For this event Bendelta is partnering with Pegasus Riding for the Disabled. Pegasus has had a significant history servicing the ACT community and this year faces financial challenges linked to the new disability funding model.

For more information on Pegasus:  
<http://www.pegasusact.com.au>

**Attendance cost is \$100**

Pegasus will receive all proceeds.

**Friday 2nd March 2018**  
**11:40am - 2:00pm**

*By 2020, Public Sector success will be shaped by the capacity to truly unleash and harness the discretionary effort and talent of people.*

*Change and disruption are ubiquitous: the imperative to invest time and resource in the science of leadership development has never been clearer.*

This event will shed important light on how organisations will fundamentally change over the next decade and how senior executives can best develop their own capacity to lead in this context.

At this event, Bendelta will share with attendees:

- What true commitment to leadership capability looks like – and how it's nothing like what we've accepted up until now.
- Which leadership capabilities will be most mission-critical in the decade ahead.
- Which scientific tools and methods will catalyse the new wave of leadership development.
- Key strategies for building resilience at an individual and an organisational level.

Our remarkable panel includes:

#### **TREVOR HENDY**

Unchallenged as the greatest Ironman in history, Trevor provides his personal experience of what commitment to building world class capability looks like, including harnessing mindset and emotion.

#### **PETER GRETE**

One of Australia's best known journalists and former political prisoner, providing his personal experience of resilience, another critical capability.

#### **DR NATALIE FERRES**

Author of 'People Development', foreshadowing the next horizon in leadership development.
